

WE'RE EXPANDING OUR CARE IN THE COMMUNITY

Lake Charles Care Center is creating a truly unique environment with the addition of a Memory Care Unit. This specialized program is for individuals living with Alzheimer's or other dementia-related illnesses. The secure 22-bed area is based on the social model of care, which maximizes the functional independence of each resident by capitalizing on the resident's individual interests. Lake Charles Care Center is dedicated to raising the standards of excellence in providing quality living for those with Alzheimer's and other dementia-related illnesses.

Our Memory Care Unit offers dedicated, specially trained staff based on the latest research and techniques in Alzheimer's and dementia care. From the secure entry door and outdoor patio/garden area to the soothing colors and specially-designed features, the residents' safety, physical and psychological needs are the primary concern of Lake Charles Care Center's Memory Care Unit.

The residents of our Memory Care Unit enjoy:

- a secure 22-bed, self-supported community
- a safe and comfortable environment
- 24-hour nursing care
- activities tailored to past history and lifestyle
- use of old photos for way-finding
- a common area designed for orientation purposes
- a secured walking path
- no overhead paging
- monitored television programming
